Environmental Policies

The green campus concept offers an institution, the opportunity to take the lead in redefining its environmental culture and developing new paradigms by creating sustainable solutions to environmental, social and economic needs of mankind. The college demonstrates higher sensitivity and responsibility in implementing following green policies in the campus.

- Massive plantation drive by teaching, nonteaching staffs and students of the college in the campus as well as nearby area/road side area of the college.
- Assign projects to students on different environmental issues, Waste management, Water management, Energy management, E-Waste management, Rain water harvesting.
- Promote and advocate the implementation of solar passive technology for sustainability and green concepts.
- Carry out Green Audit and Energy Audit of the campus to improve sustainable resource management practices, based on 3r -reduce, reuse and recycle principles.
- Spread the awareness amongst society about the waste management,
- Set and achieve targets for reducing resource use.
- Increase the rate of recycling of all appropriate materials based on life-cycle principles.
- Advocate the benefits of paperless work in reducing the waste production.
- Tobacco free and smoking free campus
- Arrange appropriate environmental educational programmes for staff and students by organising seminars, lectures and conferences.

Department of Chemistry

On 15/09/2023 & 16/09/2023, the department organises two days workshop on the occasion of "International Day for the preservation of the Oxone layer / Ozone day?" The theme for this year is "Montreal Protocol: Fixing the oxone layer and reducing climate change."

Considering the theme, the department organises speech and essay writing competitions on 15/09/2023 whose success is evidenced by the student participation in the event.

On 16/09/2023, a lecture is delivered on the Montreal Protocol by Dr. Shubhangi Tripathi. In the view of the importance of the oxone layer & its preservation methodology, a plantation drive is also arranged in the campus.

List of the attendees, notice/permission letter regarding the event, photographs & brochure has been attached for ready references.

मानव जीवन के लिए ओजोन परत का क्षरण हानिकारक

खगोल. जगत नारायण लाल कॉलेज में रसायन शास्त्र विभाग और आइस्क्यूएसी द्वारा विश्व ओजोन दिवस पर दो दिवसीय कार्यशाला का आयोजन प्राचार्य प्रो मधु प्रभा सिंह की अध्यक्षता में किया गया. प्राचार्य श्री सिंह ने कहा कि ओजोन परत का क्षरण मानव जीवन के लिए हानिकारक है. पृथ्वी के वातावरण में उत्पन्न प्रदूषण के कारण लगातार ओजोन परत में ह्रास हो रहा है जो एक गंभीर समस्या का विषय है. लोगों में ओजोन ह्रास के प्रति जागरूकता फैलाने और मानव जीवन हेतु उसकी अहमियत समझाने के लिए ही प्रतिवर्ष विश्व ओजोन दिवस मनाया जाता है. इसके पूर्व रसायन विज्ञान विभाग की अध्यक्ष मह. समन्वयक डॉ शुभांगी त्रिपाठी ने प्राचार्य, मुख्य वक्ता सहित सभी प्रतिभागियों का स्वागत किया. विशिष्ट वक्ता के रूप में डॉ मंजुवी सुदर्शन और डॉ पल्लवी ने ओजोन परत क्षरण: वर्तमान स्थिति और भविष्य की चुनौतियों के बारे में अपना पक्ष रखते हुए पयांवरण के बारे में कई महत्वपूर्ण बिंदुओं को जानकारी दी. कार्यशाला के पहले दिन प्रतिभागियों के बीच ओजोन दिवस से संबंधित पोस्टर प्रतियोगिता, क्विज और भाषण प्रतियोगिता का आयोजन किया गया. कार्यशाला के अंत में ओजोन परत संरक्षण के लिए पौधा लगाकर वायुमंडल को प्रदूषण मुक्त रखने का संकल्प दिलाया गया.

On 15/09/2022 @ 11:00 am & On 16/09/2022 @ 10:30 am the department organised two days workshop on the occasion of International Day for the Preservation of Ozone layer / ozone day. The theme for that day 2022 is "Global Co-operation to Protect life on Earth" by UNEP.

Considering the theme, department of chemistry organises one week National level Quiz competition through ONLINE mode whose success is evidenced by the matrix attached alongwith.

Besides this, the department organises exhibition of posters & slogans along with speech competition among students to spread awareness about our mother nature on 15th of september, 2022. (Details of the participants are attached alongwith).

Further, on the ozone day i.e 16th/09/2022, a lecture is organised. The keynote address is delivered by Dr. Shubhangi Tripathi, HOD Chemis. The distinguished speakers of the event is Dr. Pallavi HOD Botany & Dr. Medhavi Sudarshan, HOD Zoology.

To embark the success of the event plantation drive is also arranged in the campus near Sri Hanuman Ji mandir / temple.

List of the attendees, notice regarding event, photographs of the event & banner has been attached herewith for ready references.

**Water Fluoridation: Physiological effects of Ingested
Fluoride-Mitigation and Management**
By
Dr. Shubhangi Tripathi

Water fluoridation is the controlled adjustment of fluoride to a public water supply solely to reduce tooth decay. Fluoridated water contains fluoride at a level that is effective for preventing cavities; this can occur naturally or by adding fluoride. Fluoridated water operates on tooth surfaces: in the mouth, it creates low levels of fluoride in saliva, which reduces the rate at which tooth enamel demineralizes and increases the rate at which it remineralizes in the early stages of cavities. **Typically a fluoridated compound is added to drinking water.** Defluoridation is needed when the naturally occurring fluoride level exceeds recommended limits. In 2011, the World Health Organization suggested a level of fluoride from 0.5 to 1.5 mg/L, depending on climate, local environment, and other sources of fluoride. Bottled water typically has unknown fluoride levels.

Tooth decay remains a major public health concern in most industrialized countries, affecting 60–90% of schoolchildren and the vast majority of adults. Water fluoridation reduces cavities in children, while efficacy in adults is less clear. Most European countries have experienced substantial declines in tooth decay, though milk and salt fluoridation is widespread in lieu of water fluoridation.

Although fluoridation can cause dental fluorosis, which can alter the appearance of developing teeth or enamel fluorosis, the differences are mild and usually not an aesthetic or public health concern. There is no clear evidence of other side effects from water fluoridation. Fluoride's effects depend on the total daily intake of fluoride from all sources. Drinking water is typically the largest source; other methods of fluoride therapy include fluoridation of toothpaste, salt, and milk. The **World Health Organization** reports that water fluoridation, when feasible and culturally acceptable, has substantial advantages, especially for subgroups at high risk, while the European Commission finds no benefit to water fluoridation compared with topical use.
